PROJECTS

Student Database Management System (HTML , CSS , JavaScript)

College Student Information Management System. This project includes functionalities for storing, retrieving, updating, and deleting student records. The system can store various information such as student profiles, enrollment details, grades, attendance, and more.

Library Management System (HTML, CSS, React.js)

Library Management System. This project helps librarians and library staff in organizing, cataloging, tracking, and circulating library materials efficiently. It provides a centralized platform for librarians to handle tasks such as cataloging, circulation, acquisitions, and user management.

SKILLS

Technical Skills :

- C , C++ ,
Java, JavaScript
Programming
Languages
- Git and Github

Non- Technical Skills :

- Problem Solving
- Communication Skill

ACHIEVEMENTS

Machine Learning Implementation using Python - Alpha, The web Academy , Rajapalayam

EXTRA-CURRICULAR ACTIVITIES

I have won Open State Badminton Tournament

I have got C certificate in NCC

LANGUAGES

English , Tamil
